**Sub: Advisory on addition/modification of certain provisions in TraceNet with effect from 10/10/2018**

Dear Sirs,

This has reference to the above subject. In order to ensure compliances with the importing country's requirements and to further strengthen the TraceNet, following facilities are being added/modified in TraceNet and will be introduced with effect from 10/10/2018. All CBs and organic stakeholders are advised to follow the same. A summary of the modifications is given as follows:

- (a) The processing unit can register multiple units separately with same PAN number but FSSAI license no. will be unique and mandatory. The processing unit name will be as per the FSSAI license.

All existing registered sub-contracted processing units have to segregate within 90 days period. After that the system will automatically not allow the sub contracted units for any registered processing unit.

In case of sub-contracted units the units shall utilize existing stock within 90 days from the date of this advisory.

Registration of multiple processing unit(s) with same operator in the same PAN Number linking with FSSAI license of the unit as Unique ID, a provision for updating the FSSAI license number against the main processing unit will be available and all sub-contracted units have to register separately.

90 days time period will be given to CB/Operator to get the FSSAI license updated for all registered main processing units.

The fields to be filled will be FSSAI license no., Name as on FSSAI license, Validity start date & end date, capacity of the processing unit in MT/per day and CB has to verify the original FSSAI license & scan copy of FSSAI license to be uploaded by the CB.

If any operator's FSSAI license is expired, there will be provision for updating the acknowledgement slip that the unit has applied for renewal with uploading facility of acknowledgement and 90 days grace period will be given from the actual date of acknowledgement and after that system will not allow the operator to transact. Concerned CB has to verify the acknowledgement. Updation of acknowledgement slip would be allowed only after the expiry of FSSAI License no.

A flash message will be shown in operator's main login page before FSSAI validity expiry of 90 days. Concerned CB can also view the list of the processing units whose FSSAI license is going to expire within 90 days in MIS.

At the time of new registration, if any operator is already registered in the system or discontinued then their details will be visible to the Certification body based on the PAN details.

The one time facility to update the FSSAI license of existing processing unit, the details such as Name as on FSSAI license, Address, Capacity in MT (per day), Additional Certificate, validity start date & end date will be open for the 90 days from making the provision live.

No change, except the validity start & end date would be allowed.

In any case, if operator's FSSAI license is expired, then system will automatically block the operator TraceNet login.

- (b) Removal of mandatory provision of transaction certificate issuance in case of own unit of the operator registered with the same PAN with the same CB only. However, in case of transaction amongst different registered units, transaction certificate shall be issued.

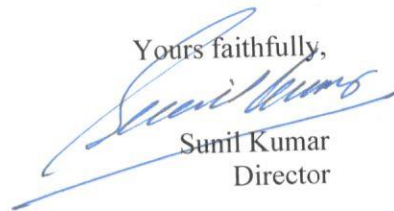

In case of own unit of the operator, an internal stock transfer will be allowed if the processing unit is registered with same PAN no. with same CB. Both options with TC/without TC but in both cases CB shall have to verify the stock. In this case, the existing provision of issuing TC will be replaced with internal stock transfer.

Internal Stock Transfer within the same PAN operator & with the same CB, the new menu with name "Internal Stock Transfer" only for the processor will be available.

- (c) Trigger to CBs/APEDA-Organic Division for termination/suspension/revoke of certificate(s) of operator(s) for various non compliances by CBs through TraceNet on real time basis:

**For Suspension/Termination/revoke of Operator** - The system has been modified with existing facility i.e. activate/deactivate operator with automatic feature capturing the start date and end date. During this period operator may not be able to login and all activities will be blocked in the TraceNet system. The end date shall co-terminate with scope validity. Automated Email will be communicated to all certification Bodies & Concerned operator regarding the Suspension/Termination & revocation of the operator in the TraceNet system. With regards to farmers, CB shall ensure that they will also not be able to register as new.

Yours faithfully,

Sunil Kumar  
Director
