Dear Certification Bodies,

As you are aware, the certification of organic cotton - lint cotton - cotton bales are covered under NPOP. Presently, from the stage of yarn till the textiles, it is covered under GOTS certification.

It has been observed that some of the Certification Bodies are not covering the lint and bales under NPOP and data is not available in Tracenet.

Therefore, it is advised that the inspection details and the related data up to bales preparation may be verified and covered under NPOP. Accordingly, you may enter the data in the Tracenet and in the annex of the scope certificate.

Regards,

Dr. PVSM Gouri
