Dear Certification Bodies,

We understand that CBs under NPOP are receiving requests from operators for approving imported products for the domestic market as well for value addition for re export. Imported products for the domestic market are required to be recertified as per NPOP requirement and for use of AGMARK logo. The details on import and recertification may be updated on tracenet since we have now created this provision

Secondly, for re export of the value added products, you are advised to forward such cases with complete details along with the TCs of the exporting countries for approval before re certification and giving approval to operators for value addition.

Regards

Dr. PVSM Gouri
Advisor NAB
