Subject: Enhanced Verification Measures for High-Risk Products (EU Category A)

Dear NOCA Operators,

In response to multiple incidents of chemical residues in high-risk products, NOCA has decided to strengthen its onsite verification and traceability system to prevent future complaints, particularly for exports to EU countries under Category A.

As part of this effort, NOCA will not issue PTC, TC, COI for the following high-risk products for the next six months:

1. Amaranth Seeds
2. Flax Seeds
3. Ginger
4. Psyllium
5. Quinoa Seeds
6. Sesame Seeds
7. Unprocessed Guar Seeds
8. Unprocessed Tea Leaves

We kindly request that you refrain from applying for PTC, TC, and COI until April, 2025. NOCA will update you once the enhanced system is in place.

We regret any inconvenience this temporary measure may cause and appreciate your cooperation in ensuring the quality and safety of our products.

Let us know if you need any further assistance!

Regards

NOCA Pvt Ltd
